Results-oriented and innovative Senior Software Engineer with 5 years of experience in providing customized and optimized solutions. Thrives under tight deadlines using agile development strategies. Proficient in leading large development teams or independently coding complex projects. Skilled at communicating complex technical requirements to non-technical stakeholders and leading development teams in enterprise-wide projects.

Work History

Senior Software Engineer, Aahlaad Software Pvt. Ltd. | Sep 2018 - Present

- Designed and developed a highly-available, fault-tolerant web application using TypeScript.
- Identified and resolved application-level bugs, improving user experience.
- Optimized application performance by implementing caching and memory-efficient data structures.
- Trained and mentored junior developers, enhancing team performance.
- Collaborated with project managers, developers, QA, and customers to resolve technical issues.
- Conducted code reviews and used troubleshooting methods to check client code for bugs and weaknesses.
- Provided technical support for new projects, solving complex technology problems.
- Designed technology solutions that met or exceeded performance expectations.
- Developed robust solutions to meet client requirements for functionality, scalability, and performance.

Accomplishments

- Promoted to senior engineer after just 3 years of employment.
- Mentored new employees to bring them up to speed on projects, resulting in quicker overall completion milestones.
- Developed solid working knowledge of engineering, design and architecture.

Projects

Versatile Communication Platform
